**DETAILED ACTION**

1. In view of amendment filed August 16, 2004, claims 4-20 have been cancelled.

Claims 1-3 are pending.

2. In view of amendment filed August 16, 2004, the rejection of Claims 1-4 under 35 U.S.C. 112, second paragraph is withdrawn. The rejection of claims 1-20 under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-10 of U.S. Patent No. 6,525,149 is withdrawn.

3. In view of amendment filed August 16, 2004, the rejection of claims 1-20 under 35 U.S.C. 102(e) as being anticipated by Baxter, Jr. et al. (US 6,525,149 B1) is withdrawn.

***Allowances***

4. Claims 1-3 are allowed.

Art Unit: 1713

5. The following is an examiner's statement of reasons for allowance:

As of the date of this office action, the examiner has not located or identified any reference that can be used singularly or in combination with another reference including the closest prior art of Baxter, Jr. et al. (US 6,525,149 B1) to render the present invention anticipated or obvious to one of ordinary skill in the art.

Baxter, Jr. et al. (col. 18, claims 1-10) claim the polymerization of isobutylene comprising a liquid feedstock providing a catalyst composition comprising a stable complex of BF<sub>3</sub> and a complexing agent. However, Baxter, Jr. et al. are silent on a method for polymerization comprising a plurality of reactors arranged for parallel flow, supplying an olefin containing feedstock and dividing the same into a plurality of separate feedstock streams, and removing a crude polyolefin product stream from each of the reactors and combining the crude polyolefin product streams to form a single crude product. Therefore, it would not be apparent to one of ordinary skill in art to the single reactor teachings in Baxter, Jr. et al. to obtain the invention of claims 1-3 which contain many specific features that are only pertained to multiple reactors arranged for parallel flow. The invention of claims 1-3 is allowed.

In light of the above discussion, it is evident as to why the present claims are patentable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, and to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***
